The heater is easy to control by using the **ONE-TOUCH** system (one button only!) LEDs indicate the current and set temperatures.

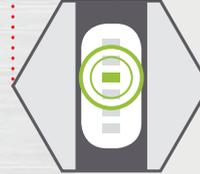

The electronic thermostat operates with an exceptional precision ($\pm 0.4^\circ\text{C}$) to maintain a constant temperature in the tank. This ensures that even the most sensitive of aquarium inhabitants live in comfortable conditions.

Temperatures can be set in the range between 20 and 33 $^\circ\text{C}$, which means the heater can be used for treating some fish diseases, including white spots.

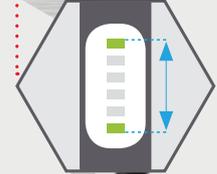

Computer tested and electronic

Clear indication of the set temperature

Temperature is adjustable in a wide range

Fully electronically controlled: the thermostat contains no failure-prone mechanical parts

High-precision electronic thermostat ($\pm 0.4^\circ\text{C}$)

Operation of the heater is indicated by a LED

Suitable for freshwater and marine aquariums

Each piece undergoes computer-assisted testing and calibration

Optimal heat distribution

25 W	20,5 cm	10-25 l	40cm +/-10cm
50 W	22,5 cm	15-50 l	60cm +/-10cm
75 W	22,5 cm	35-75 l	70cm +/-10cm
100 W	24,5 cm	60-100 l	80cm +/-15cm
